## dye sublimation MOUSEPADS >>

Dye sublimation is a relatively new printing technique that allows us to print full color images on a wide array of items such as t-shirts, flags, mousepads, and even ceramic tiles. Solid dye particles are converted into a gas using heat and pressure and are forced to bond with the material they are dying. The major benefit of this printing method is **NO SETUP** or **SCREEN CHARGES** !

All mousepads are made of Polyester with neoprene rubber backing.
